NOURELDIN MOHAMED YEHIA

Full-Stack Mobile Developer — Flutter • Supabase • Spring Boot

01020007093 nouradawy@hotmail.com https://linkedin.com/in/nouradawy https://nouradawy.tech Giza - El Sheikh Zayed

EXPERIENCE

Founder & Flutter Engineer
WhatsUnity

08/2025 – 01/2026 sprint 1

Development of a real – time community app

- Developed a comprehensive mobile platform using Flutter and Bloc to digitize compound management, enabling structured tenant organization by mapping users to specific buildings and apartment units for verified neighbor interactions
- Built a dedicated polling and voting module detached from general chat streams. This feature allows residents to vote on community situations using visual analytics, ensuring critical decision-making data is not lost in daily conversation flow.
- Integrated a full-stack **Supabase** backend to handle Admin-to-Resident announcements and a unified "Report History" system for Maintenance, Care Services, and Security requests.
- Deployed a self-hosted backend using **Docker**, **DuckDNS**, and Edge Functions, ensuring data privacy and low-latency real-time chat performance using **Restful APIs** and WebSockets.
- Designed a rich-media chat interface supporting Google Drive integration for file sharing and voice notes with visual waveforms.

Full stack Developer
Medicare

09/2024 – 02/2026

Medical services platform

- Designed and developed a full-stack web application for Medicare, a medical services platform, using React for the front- end and Spring Boot for building scalable and secure RESTful APIs.
- Implemented a MySQL relational database with optimized schema design and indexing for efficient data access and storage.
- Built interactive UI components with React, ensuring responsive design and seamless user experience across devices.
- Developed robust backend services with Spring Boot, handling user authentication, appointment scheduling, and role-based access control.
- Integrated third-party services and libraries for enhanced functionality such as notifications, secure login, and form validation.
- Deployed the application to a cloud environment with a focus on performance, scalability, and uptime.
- Ensured maintainable and high-quality code through modular design, version control, and thorough testing (unit and integration).
- Followed best practices in software design, application security, and RESTful APIs standards throughout the development lifecycle.

SUMMARY

Full-Stack Flutter Engineer with deep expertise in Clean Architecture, Bloc pattern, and scalable Backend-as-a-Service (Supabase/Firebase) integrations. Specialist in high-performance real-time chat systems and Dockerized self-hosting environments
. Founder and lead developer of WhatsUnity, a real-time community app built with Flutter,
Supabase, Docker, and modern cloud architecture. Experienced in preparing and publishing Android applications to Google Play (internal testing) and owning the full app lifecycle in startup environments.

TECHNICAL SKILLS

- **Flutter** (Bloc, Provider, Localization, SharedPreferences)
- REST APIs & Backend Integration
- **Supabase** (Auth, Realtime, Storage, Edge Functions)
- State Management & App Architecture
- **Docker**, Git, CI/CD
- **Firebase** (basic)
- **React** (Frontend) | **Spring Boot** (Backend)
- **UI/UX:** Figma, Adobe XD

Flutter Developer (Freelance / Projects)

11/2021- 05/2025

- Developed and maintained multiple Flutter mobile applications for
- personal and freelance projects
- Implemented state management using Bloc and Provider
- Integrated REST APIs and handled authentication and data persistence
- Worked with Firebase services and local storage solutions
- Focused on clean architecture, performance optimization, and
- localization support

UI UX Designer

06/2019 - 05/2021

- Worked on 2 WordPress E-commerce websites, Design, Host, SSL Certificate
- Achieved seamless vendor sales increase by {25%} by building a robust marketplace system.
- Enhanced user satisfaction by {15%} by designing intuitive front- end UX/UI.

EDUCATION

Computer Science Diploma - currently

Cairo University

03/2023 - 03/2026

GPA

3.2 / 4.0

Bachelor's degree in construction & building

The Arab Academy for Science, technology & Maritime Transport (ABET Accredited)

01/2009 - 02/2015

- G.P.A: 2.4 "Good"
- With Graduation Project in Green building with (A+ GRADE)
